Weekly Inspection Log

Commercial Hazardous Waste Form

Hazardous waste containers and container storage areas must be inspected weekly, looking for leaks and for container deterioration. The inspection log must include the dates and findings of these inspections. Additional items to be checked at the time of the inspections should include, but are not limited to, ensuring:

- ☐ All containers are closed
- ☐ All containers are labeled "Hazardous Waste"
- ☐ All containers include a clear description of their contents
- ☐ All containers include an accumulation start date
- ☐ Adequate aisle space is maintained in the storage areas to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to access any container in the storage area

If problems are noted during an inspection (damaged or leaking drum, etc.), then indicate the problem on the front side of this form, and describe what was done to correct the problem on the back side of this form. **Retain log for at least three years.**

Company Site Name: _____

EPA ID Number

M	N										

Inspector Names _____

Inspection Date	Inspector's Initials	Storage Area 1	Storage Area 2	Storage Area 3

Documenting Corrective Actions

Inspection Date	Corrective Action

If you need assistance completing this log or you are unsure of the appropriate corrective action for a problem, please contact the inspector you are working with or call 612-348-3777 and ask for the environmentalist-on-call.
