

# Indoor air quality and industrial hygiene

## Description

Indoor air quality and industrial hygiene consulting services for Hennepin County facility projects.

## Typical services

Project deliverables may include the following:

- Worksite and employee sampling for exposure to chemicals, dust, lead, asbestos, silica, mold, and noise using approved sampling methodologies and ensuring proper laboratory analysis. Provide sampling equipment that is calibrated and meets regulatory requirements or best practices. Provide a written, detailed report with findings, photos, and recommendations.
- Worksite assessments to evaluate HVAC equipment, facilities management practices and identifies potential pollutants and their impacts on employees/clients in our facilities. Where required, perform sampling to determine presence or location of indoor air pollutants. Provide written, detailed reports with findings, photos, and recommendations to mitigate indoor air quality issues.
- Design of engineering controls and work practices.
