Questions or concerns?

If you would like to speak with the project team about this change in the preferred design concept, please reach out to the project contact.

hennepin.us/minnetonka-boulevard

We heard your feedback

During the previous phase of engagement, the project team heard the following about the preferred design:

- Restricting left turns onto Inglewood Avenue would increase traffic on Joppa Avenue. This could impact the effectiveness of the pedestrian enhancements made to the corridor.
- Joppa Avenue only extends two blocks north, requiring northbound traffic to re-route east to continue heading north.

Revised preferred design

To address what we heard, the project team redesigned the Minnetonka Boulevard/Inglewood Avenue intersection to allow eastbound left turns. This change in the preferred design:

- Directs less traffic onto Joppa Avenue, reducing the potential impact of increased traffic on the safety of people walking, biking and rolling in the area, including students traveling to nearby schools.
- Maintains Inglewood Avenue as the preferred access route north of Minnetonka Boulevard.
