

Osseo Road reconstruction

Purpose

Hennepin County is working on early designs for reconstructing Osseo Road from Penn to 49th avenues in Minneapolis. The existing roadway has reached the end of its service life and is due for replacement. As a part of the reconstruction project, pavement, curbs and gutters will all need to be replaced. We will also be:

-  improving the corridor for people walking, rolling, biking, riding the bus and driving
-  improving roadway and intersection safety
-  reviewing traffic signal opportunities to enhance traffic operations

This segment of Osseo Road is a part of County Road 152 and is a connector between the soon-to-be-finished Brooklyn Boulevard reconstruction project in Brooklyn Center and next year's Webber 44 reconstruction project in Minneapolis.

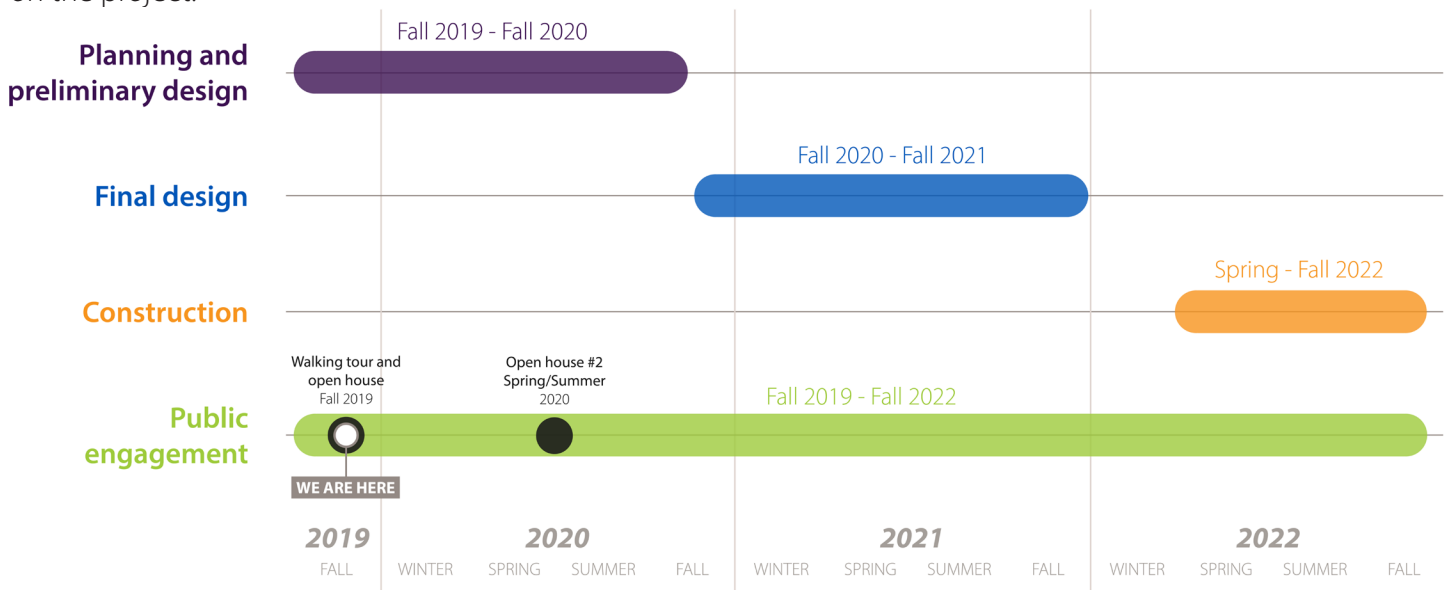

Construction of Osseo Road is anticipated to begin in 2022.

Schedule

Work on early designs for Osseo Road is underway and will continue through fall 2020. Engagement activities are ongoing to collect input from the community, help inform the design work and to keep the community updated on the project.

We want to hear from you!

Your feedback is important for shaping the early design for Osseo Road between Penn and 49th avenues.

What ideas do you have for making Osseo Road feel safer for walking, rolling, biking, riding the bus and driving?

How do you use Osseo Road and how often?

Which improvements are a priority for you?

What intersections do you use (or not use) to cross Osseo Road?

Do you use or know about the staircase on the southwest side of the Osseo Road bridge?

How can I provide my feedback?

Provide your input and stay updated on the Osseo Road reconstruction project through a variety of ways:

Visit the project website: hennepin.us/osseoroad

Submit your input through an online survey
