

# Vernon Avenue Bridge replacement and intersection improvements

## Initial design virtual open house summary

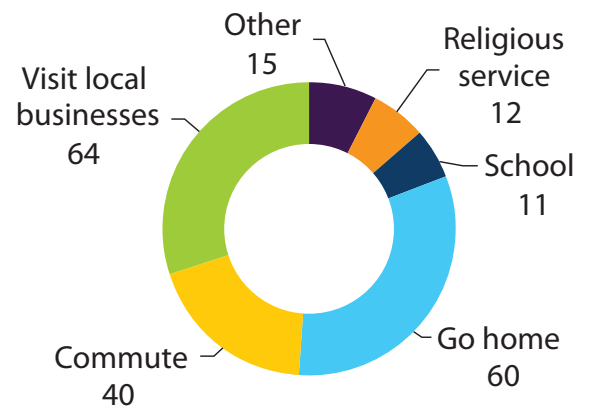

Project staff for the 2023 Vernon Avenue Bridge replacement and intersection improvements began community engagement efforts for initial design in May 2021. The first step was launching the virtual open house on May 10 using the ArcGIS Story Maps interactive online platform. The virtual open house included information and graphics of the initial design and a survey for community feedback through June 30. Below is the open house and survey summary.

**73**  
Survey responses

**980**  
Unique project website visits

**Modes of travel through the project area**

**Purpose for travel through the area**

## Common themes

Participants liked the pedestrian improvements

Participants favored the enhanced aesthetics, including landscaping

Participants desired enhanced bicycle connections

Participants shared that coordination with current and future development in the area was important

Participants favored the dedicated turn lane to Gus Young Ln

Participants had mixed feelings about the Highway 100 off-ramp realignment

Some participants were concerned about construction impacts to residents
